EDUCATION

Bachelor of Technology in Computer Science and Engineering	2021 - 2025
Vellore Institute of Technology, Andhra Pradesh	
CGPA : 8.54	
<i>Vice President (2023-24) and Event Management Lead (2022-23) of Be A Nerd</i>	
<i>Event Curator (2024) and Editorial Team (2023) in TEDxVITAP</i>	

SKILLS

AI/LLM Engineering	RAG Pipelines, LangChain, LangSmith, Hugging Face Transformers, PEFT, Prompt Engineering, NLP, NLTK, spaCy, KV Cache Optimization, n8n
ML and CV	PyTorch, TensorFlow, Keras, Scikit-learn, OpenCV, YOLO
Data Science	NumPy, Pandas, Matplotlib, Seaborn
Languages	Python, Java, JavaScript, SQL, R
Backend	Flask, Node.js, Express.js, REST APIs
Databases	PostgreSQL, MySQL, MongoDB, Supabase, Vector Databases
Cloud and Infrastructure	Kubernetes, Docker, Gloo Gateway, Apache APISIX, Argo CD
DevOps and Observability	Git, GitHub, GitHub Actions, CI/CD, Datadog, Grafana, Jira
AI Developer Tools	ChatGPT, GitHub Copilot, Google Gemini, LM Studio

EXPERIENCE

Performance Engineer	February 2026 - Present
Accenture (Client: Vertex Inc.)	Hyderabad, Telangana
- Designed an AI repository analysis system using GitHub Actions and automated CI/CD workflows to detect AI-generated contributions and AI usage across 50+ repositories. - Worked on Kubernetes route migration, utilizing AI-assisted tools to accelerate troubleshooting, configuration validation, and deployment support while ensuring reliable traffic management for cloud-native applications. - Evaluated engineering workflows for AI adoption, applying Queueing Theory and Universal Scalability Law (USL) to assess scalability and identify automation opportunities.	
Advanced App Engineering Analyst	September 2025 - Present
Accenture	Hyderabad, Telangana
- Completed a 3-month intensive development program focused on Python and Data Analytics. - Designed and implemented end-to-end data pipelines to process 6 unstructured CSV datasets using Pandas and NumPy, and integrated processed data into MySQL using <code>mysql.connector</code> - Developed backend applications and analytical workflows using Flask, PyMySQL, Matplotlib, Seaborn, and implemented RNN models for data-driven insights.	

PROJECTS

- Multimodal Parkinson's Disease Detection.** Developing a deep learning framework with **3 modalities**—keystrokes (0.77 AUC), gait (0.98 AUC), and voice—using public datasets for early Parkinson's disease detection.
- Courtroom Agent Simulator.** Developed an agentic AI courtroom simulation with autonomous judge and lawyer agents, benchmarking **5+ LLMs** over a RAG-based legal knowledge base containing **1,000+ legal acts** and **1,000+ court judgments**.
- Leveraging Emotional Cues and Embeddings for Fake News Detection** Collaborated with a team of 4 to implement a fake news detection model using dual emotions. Achieved 85% classification accuracy using a dual-emotion embedding architecture.

EXTRA-CURRICULAR ACTIVITIES

IIIT Jabalpur MLH Hackathon. Best Beginner Award (April 2024)
